

High Pressure Centrifugal Slurry Pump Horizontal Split Case Sewage with Support Frame

Our Product Introduction

Basic Information

- Place of Origin: Sichuan, China
- Brand Name: horizontal-slurrypump.com
- Certification: ISO9001
- Model Number: OEM
- Minimum Order Quantity: 1 set
- Price: USD500-5000/set
- Packaging Details: free fumigation export wooden box packaging
- Delivery Time: 25 working days after receiveing advance payment
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram, Paypal
- Supply Ability: 300 sets per month

Product Specification

- Capacity Range: 4 ~ 3000 M³/h
- Head Range: 10 ~ 130 M
- Structure: Splite Case
- Material: High Chrome Alloy And Rubber
- Motor Power: Less Than 315KW
- Temperature: Up To 110° C
- Highlight: **centrifugal mud pump**

Product Description

Horizontal Split Case Sewage Pump , High Pressure Centrifugal Slurry Pump with Support Frame

Product Description

Good cavitation: The cavitation performance is good, which ensures that the suction pump has a larger capacity and a higher head, and can achieve a higher suction concentration.

Wide flow channel: The pump adopt wide flow channel, ensure the overflow capacity.

Various properties: By changing the rotate speed or the diameter of the impeller, the characteristics of the pump can be changed.

Wear-resistant: Impellers, volutes, linings and other over-current components are made of wear-resistant alloy, with a hardness of not less than 50 HRC, and have strong impact resistance and corrosion resistance.

Application

1. applicable onboard for dredging inland channel, exploiting seashore, and conveying the slurries with solid particles for coal mine enterprises, mine enterprises, power plants, etc.
2. used onland as dredger booster pump for conveying sand slurry in long distance.if one pump can not meet requirement of discharge distance,multiple pump can be used in series.

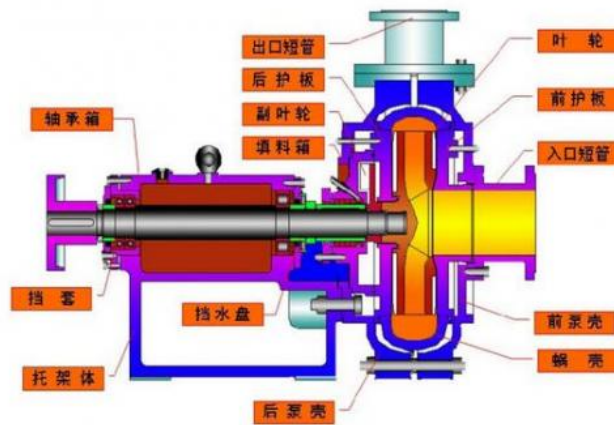

Details

1. Support frame:main part for supporting flow parts,connect with bearing plates on the two sides to form bearing assembly.
2. Pump casing:connect with support frame by 6 bolts,can rotate in 60°gap according to needs,impeller,protecting plate,pump cover installed inside,material is abrasion resistant,the impeller,pump casing and pump cover of this pump are same as 6PNL-30 vertical mud sand pump.
3. Split type pump casing with long pump cover(flat pump cover and long pump cover).one body pump casing is available also.

Structure

ZJ系列卧式渣浆泵结构简图

Production Process

We have our own production line. The design, casting, cold processing, assembly, testing and detection of the products are all completed by ourselves. We have advanced resin sand casting technology, advanced mechanical processing equipment, high volume medium frequency furnace and advanced chemical composition analysis equipment, advanced comprehensive performance testing platform.

Our Service

Before-sale service: Product introduction, technical exchange, non-standard product design, problem explanation.

In-sale service: 1. Honoring contracts, ensuring on-time delivery, keeping contact with users at any time.
2. For special or complicated [products, arrange persons to provide the users with training and guidance at the product use, troubleshoot, adjustment and repair.

After-sale service: 1. Offer a warranty for 12 months from the date of ex-works, with return, replacement and repair available.
2. During the use of products, carry out a periodic organization of the personnel in charge of the technique, quality inspection and service to contact the users to get the feedback on the quality, conditions of use, comments on improvement etc. so as to further enhance the quality.
